

QUALITY AND ENVIRONMENTAL POLICY

The main aim of our company is manufacturing of wide range of high quality insoles according to requirements of our customers, taking into account optimal production costs and care for the natural environment.

We implement the quality and environmental politics by:

- compliance with applicable legal requirements
- current cooperation with our customers in order to precisely specify and fulfil requirements and to suggest new solutions that will be safe for the environment
- current cooperation with our suppliers to assure that our requirements are understood and to guarantee high quality of deliveries of environmental friendly materials and components
- modernization of our transport park, taking into account the safety of employees and the impact on the environment
- improvement of qualification of our staff and systematic mutual pro-ecological education
- permanent improvement of processes that lead to the adjustment and improvement of the effectiveness of our quality and environmental management system
- continuous optimization of processes that contributes to the reduction of pollution and waste

Every year we establish measurable aims concerning quality and environment. They are being conveyed to the information and realization to the whole staff of the company.
